Hello, World!

Write a class called `HelloWorld` that prints the following words to the standard output:

```
Hello, World!
```

Remember that the name of the file must be the same as the name of the class with `.java` appended to it. In other words, your file should be named `HelloWorld.java`.

Submit your assignment by copying the `HelloWorld.java` file into your personal submissions directory. There is no need to place the `HelloWorld.class` file in the directory.
